

The image is a perspective view of a massive, repeating hotel building facade. The building is a light tan color with a grid of many small, rectangular windows. In the center, there is a courtyard with a paved path leading to a central entrance. The entrance features a large, arched doorway and a balcony above it. The building's facade is symmetrical and repeats itself on both sides of the central path, creating a sense of infinite repetition. The sky is a pale, hazy blue.

The Grand Hotel Infinita is a place where the rooms never end and the mysteries are truly boundless.

When the most cherished possessions of the guests vanish without a trace, panic spreads through the lobby. How can Anne and her clever Border collie, Scotch, find a missing pipe or a lost monocle in a hotel with an infinite number of rooms and floors? It seems like an impossible problem, but Anne and Scotch are about to discover that even a paradox can have a perfectly logical solution.
